

Khaled Shawky

DEVOPS ENGINEER

Cairo, Egypt | +20 109 534 4552 | khaledshawky500@gmail.com | linkedin.com/in/khaled-shawky11 | github.com/SeniorKhaled

Objective

Junior DevOps Engineer and Computer Science graduate with hands-on experience in **AWS** cloud environments, **CI/CD** automation, **GitOps**, and infrastructure as code. Experienced with **Linux**, **Docker**, **Kubernetes**, **Jenkins**, **Ansible**, and **Terraform**, with practical experience deploying cloud infrastructure and containerized applications. Strong team player with proven communication, leadership, and organizational skills gained through professional experience and university event coordination.

Experience

Digital Analyst | Target State

May 2026 – Sep 2026

- Reviewed and assessed Saudi government agencies' digital services against the **Digital Government Authority (DGA)** Digital Transformation Standards (DGA-1-2-1-111), covering 10 compliance perspectives
- Produced structured compliance reports per perspective — including Strategy & Planning, IT Infrastructure, Cloud Architecture, Digital Services Quality, and Website Efficiency
- Analyzed agency-submitted documents and requirements to identify gaps and update reports accordingly
- Used **Google Lighthouse** to audit Saudi government websites for technical performance, accessibility, and best practices — identifying and reporting bugs and non-compliance issues

DevOps Engineer Trainee | Digital Egypt Pioneers Initiative (DEPI)

Nov 2025 – May 2026

- Completed an intensive 6-month government-sponsored DevOps training program covering Ansible, Docker, Kubernetes, Jenkins, Terraform, Prometheus, and AWS
- Built a production-grade GitOps CI/CD pipeline on AWS as a graduation project
- Applied IAM least-privilege principles, immutable image tagging, and GitOps two-repo separation pattern in a real cloud environment

Education

Arab Open University, El Sherouq, Egypt

Sep 2021 – Jul 2025

Bachelor of Science (B.Sc.), Computer Science

Technical Skills

- DevOps & CI/CD:** Ansible, Docker, Kubernetes, Jenkins
- Cloud Platforms:** AWS Fundamentals (EC2, S3)
- Operating Systems:** Linux Administration, Windows Server Administration, Troubleshooting
- Scripting & Coding:** Python, Bash, C++, Java, HTML, CSS, JavaScript
- Databases:** SQL, MySQL, MongoDB
- Tools & Version Control:** Git, GitHub, Postman, VS Code
- Practices & Concepts:** Algorithms, Data Structures, OOP, Networking, Virtualization
- Frameworks & Libraries:** Node.js, Express, Angular, TailwindCSS, Bootstrap

Additional Training: CompTIA A+, CompTIA Network+

Projects

Secure Notes App — AWS EC2 Deployment

- Deployed a Flask/MariaDB web application on an AWS EC2 instance running RHEL 10, configuring security groups, firewall rules, and port access
- Provisioned and mounted a 1GB EBS volume as a dedicated backup storage location, implementing a mysqldump backup strategy for database persistence
- Managed full Linux server setup including dependency installation, MariaDB configuration, and application process management

GitOps CI/CD Pipeline

- Provisioned AWS infrastructure (EC2, EKS) using Terraform
- Deployed Jenkins on EC2 using Docker Compose
- Built CI pipeline with Jenkins to build and push Docker images to DockerHub
- Implemented GitOps with ArgoCD on Amazon EKS
- Automated deployments via GitHub webhooks

Volunteering

Resala Organization

May 2017 – Jan 2019

- Volunteered to support community initiatives by participating in Et3amgy section food aid distribution program
- Worked closely with team members to organize events, demonstrating teamwork, communication, and leadership skills

AOU Student Union

Sep 2021 – Jul 2025

- Worked as an on boarding and event organizer
- Served as an organizer for the university's Red Demon event, a large-scale modified cars exhibition that hosted 25 customized cars, managing logistics, participant coordination, and on-site event execution
