Summary

Software Engineer with experience in building and maintaining scalable enterprise systems across backend and full-stack environments. Strong foundation in software design principles, system thinking, and problem-solving, with experience working on both modern and legacy systems. Collaborative team player with an Agile mindset, effective communication skills, and a strong focus on delivering reliable, maintainable, and high-quality software solutions.

Professional Experience

Identity & Access Management (IAM) Engineer

Dec 2025 - Mar 2026

Smpl ID

Cairo, Egypt

- Contributed to IAM solution development using the One Identity framework, supporting identity lifecycle management and access control processes.
- Assisted in implementing user provisioning workflows and automation scripts using .NET to improve operational efficiency.
- Supported configuration and customization of identity management policies aligned with organizational access requirements.

Technologies: One Identity, .NET, IAM workflows, identity provisioning systems

Software Engineer

Aug 2024 - Dec 2025

Ezz Steel (EZDK)

Alexandria, Egypt

- Developed backend services using Java and Spring Boot, including REST APIs, email notifications, and enterprise workflows.
- Built and maintained frontend applications using React and legacy Sencha Ext JS for internal systems.
- Collaborated in Agile teams to integrate services, troubleshoot production issues, and improve system stability using Git and Jira.

Technologies: Java, Spring Boot, Maven, REST APIs, React, Sencha Ext JS, JavaScript, Git, Jira, Email Services

Technical Skills

- Backend Technologies:** Spring, Spring Boot, Node.js, Express, NestJS
- Frontend Technologies:** React.js, TypeScript, JavaScript, ECMAScript, Material UI, Sencha, Tailwind, Bootstrap, CSS3, HTML5
- Database & Caching Systems:** Hibernate, Oracle PL/SQL, MySQL, SQL, MongoDB, NoSQL, Redis
- Software Engineering:** SOLID, Design Patterns, Data Structures, Algorithms, OOP, Networking, Operating Systems, System Design, RESTful APIs
- Event Streaming & Messaging:** Apache Kafka
- Application Security:** Authentication & Authorization (JWT, RBAC), IAM Principles
- Developer Tools:** Docker, Kubernetes, Linux/Unix, Bash Script, Git, GitHub, Postman, DBeaver, Jira, JasperReports (iReport)
- Programming Languages:** Java, TypeScript, JavaScript, Python, C/C++

Projects

Pluggable Authentication & Authorization Module ([GitHub Link](#))

Project Overview:

Reusable authentication and authorization module designed to be integrated into backend services as a dependency, providing flexible identity and access management.

- Built a modular Spring Boot authentication system supporting JWT, Basic Authentication, and OTP verification (Email/SMS).
- Implemented RBAC with runtime authentication strategy switching for secure and dynamically configurable backend services.

Technologies: Java 17+, Spring Boot, Spring Security, JWT, H2, Maven, REST APIs, OTP (Email/SMS)

Flight Management System ([GitHub Link](#))

Project Overview:

Full-stack flight management platform for browsing, booking, and managing flights with real-time notifications and modern UI.

- Developed Spring Boot REST APIs for flight, booking, and user management with MySQL/H2 integration.
- Built a responsive React + TypeScript frontend with Redux and implemented real-time notifications using WebSockets and email reporting.

Technologies: Java, Spring Boot, WebSocket (STOMP), JavaMailSender, MySQL, H2, React, TypeScript, MUI, Redux, React Router

Price Window ([GitHub Link](#))

Worked on maintaining and extending a legacy enterprise desktop-style web application built with Sencha Ext JS, focusing on data-driven UI components and user workflow improvements.

- Developed and maintained Sencha Ext JS interfaces including dynamic data grids, forms, and CRUD functionality.
- Improved UI modularity, validation, filtering, and search capabilities to enhance maintainability and user experience.

Technologies used: Sencha Ext JS, JavaScript, HTML/CSS, REST APIs

Courses

- **OCI AI Foundations Associate (2025)**
- **Competitive Programming using C++ (3 levels)** - [Reference](#)

Education

Faculty of Artificial Intelligence - Kafr El-Sheikh University

Bachelor's degree in Artificial Intelligence

Grade: Very Good - CGPA: 3.1

Kafr El-Sheikh, Egypt

Oct 2020 – Jun 2024

Languages

English: Fluent

Arabic: Native
