PROFILE SUMMARY

IT Application Support Manager and Enterprise Solutions Specialist with 10+ years of experience managing mission-critical business applications across insurance, government, banking, and enterprise environments. Proven expertise in application support, service delivery, incident management, and operational excellence, ensuring high availability and performance of enterprise platforms serving thousands of users.

Experienced in supporting ERP, CRM, workflow automation, enterprise content management, and integrated business applications while collaborating with business stakeholders, vendors, and technical teams. Strong background in SLA management, problem management, root cause analysis, production support, application monitoring, and continuous service improvement.

Demonstrated success in leading cross-functional teams, managing enterprise integrations, driving platform modernization initiatives, and delivering reliable, scalable, and secure application services aligned with business objectives.

PROFESSIONAL EXPERIENCE

Tawuniya Insurance – Senior Specialist – Application Support & IT Operations

May 2021 – Present | Riyadh, Saudi Arabia

- Lead application support and operational management activities for enterprise content management, workflow automation, and business-critical platforms supporting 2,500+ users across multiple departments.
- Manage incident, problem, and change management processes, ensuring timely resolution of issues and maintaining 99.9% service availability.
- Coordinate with business stakeholders, vendors, infrastructure teams, and development teams to resolve production issues and deliver application enhancements.
- Monitor application health, performance, capacity, and availability using enterprise monitoring solutions, implementing proactive measures to reduce recurring incidents.
- Prepare operational reports, service reviews, KPI dashboards, and SLA compliance reports for management and business stakeholders.
- Support integrations with Oracle EBS, mobile applications, external entities, and enterprise business systems, ensuring seamless business operations.

- Lead application upgrades, releases, disaster recovery exercises, failover testing, and production deployments while minimizing business disruption.
- Develop operational procedures, troubleshooting guides, and knowledge base documentation to improve support efficiency and service quality.
- Mentor support engineers and technical teams, providing guidance on incident resolution, troubleshooting methodologies, and operational best practices.
- Architect and manage IBM FileNet P8, BAW, and Datacap platforms in High Availability and Disaster Recovery environments, ensuring platform stability, scalability, and security.

Ministry of Finance (MOF), UAE – ECM Consultant & IT Specialist

Aug 2018 – May 2021 | Abu Dhabi, UAE

- Supported and maintained enterprise applications serving finance, payroll, HR, and government business functions.
- Led integration initiatives between IBM FileNet, Oracle EBS, and .NET systems, enabling automated workflows and document governance.
- Provided L2/L3 application support, troubleshooting critical production issues and ensuring compliance with operational SLAs.
- Collaborated with business users, vendors, and technical teams to identify system improvements and implement application enhancements.
- Managed FileNet platform upgrades (v5.2.1 → v5.5.5), improving system stability, scalability, and operational readiness.
- Implemented Datacap OCR solutions for bilingual document processing, increasing processing efficiency by 65%.
- Defined governance policies, operational procedures, and support standards to improve compliance and service quality.
- Coordinated vendors, system upgrades, testing activities, and production releases for critical government platforms.

IBM Egypt – ECM & Automation Consultant

- Integrated SAP with IBM Content Engine to automate document approval workflows
- Developed business rules automation using IBM ODM Live, reducing manual processes
- Streamlined content management workflows to enhance speed and accuracy
- Orchestrated cross-system integration between SAP, ECM, and automation platforms

Belastingdienst (Netherlands) – ECM & Datacap Optimization Consultant

- Created dynamic, user-configurable Datacap panels for flexible workflow management
- Rebuilt and optimized Datacap scanning systems for large-scale government operations
- Implemented automated document classification, reducing manual effort by 50%
- Provided knowledge transfer and training to local teams, enhancing operational capability

KEY PROJECTS

Tawuniya Insurance – Enterprise DevOps & Digital Operations Transformation
Enterprise FileNet Platform – Tawuniya

- Designed full **FileNet architecture (HA/DR)**
- Integrated FileNet with core insurance systems and external entities
- Achieved high availability and optimized performance across enterprise

Ministry of Finance (MOF), UAE – Government Content Modernization & Automation

- Delivered ECM modernization using **FileNet + BAW + Datacap**
- Automated financial and HR workflows
- Established governance and compliance frameworks

Oman Arab Bank (OAB) – Banking Automation & Enterprise Workflow Governance

- Integrated SAP with IBM Content Engine to digitize and automate document approvals.
- Implemented business rules automation using IBM ODM Live, reducing dependency on manual validations.
- Optimized enterprise content workflows, increasing processing accuracy and speed.

Belastingdienst (Netherlands) – Government Workflow Digitalization & Intelligent Scanning

- Rebuilt the entire Datacap scanning and classification system, supporting high-volume government operations.
- Developed dynamic, user-configurable Datacap panels, giving teams more operational control without code changes.
- Implemented automated document classification, reducing manual effort by 50% and improving accuracy.
- Integrated Datacap with enterprise systems, enabling smarter inter-department workflows and stronger governance.
- Conducted training and capability-building sessions, enhancing internal IT competencies and transformation adoption.
