Profile

Analytical and detail-oriented Data Analyst with hands-on experience in data cleaning, transformation, and visualization using Excel, SQL, Power BI, Tableau. Skilled in building efficient data models, writing optimized queries, and creating interactive dashboards to support data-driven decision-making. Passionate about uncovering insights from data and presenting them in a clear and meaningful way. Strong understanding of relational databases, business intelligence concepts, and real-world data challenges.

Professional Experience

Technical Support And Data Report, *Sahm*

01/2026 – 07/2026 | Nasr City, Egypt

- Prepared and analyzed operational data and periodic reports using Excel.
- Ensured data accuracy, performed data validation, and monitored reporting requirements.

Product management and Data entry, *Grand Food*

04/2024 – 10/2024 | Asyut, Egypt

Managing accounts and invoices at El-Motahda Food Products Company using Excel and ERP System.

Education

Bachelor of Computer and Information Technology

09/2018 – 06/2022 | Asyut, Egypt

Egyptian E-Learning University

GPA: 3.56 Graduation Project's Grade is Excellent

Skills

Programming Skills

SQL, Python

Presentation Skills

Excel, Power BI, DAX, Tableau

Database Skills

SQL, SQL Server, SSIS, SSAS, SSRS, ETL

Version Control

Git, Github

Interpersonal Skills

Teamworker, Presentable, Time Management, Problem Solver, Analytical Thinking

Languages Skills

Arabic(Native), English(Intermediate for work)

Internships

Intensive Code Camp ITI, *Power BI Development*

03/2025 – 07/2025 | Sohag, Egypt

Trainee to use SQL and SQL servers to Design Database and implement data, and learn ETL data warehousing tools such as SSIS, SSAS, SSRS, use data to visualization by using Tools Power BI and Tableau to find question Serves business and makes decisions that help decision makers

Projects

SkyLine Real Estate, *Github*

Tools: Excel, SQL, SSIS, SSAS, SSRS, Power BI, Tableau The project aimed to build a complete data analytics pipeline for the real estate domain. We started with raw transactional data stored in Excel and imported it into a structured SQL Server OLTP database. Using SSIS, we transformed and loaded the data into a dimensional data warehouse (OLAP) following the galaxy schema model. Then used SSAS to design multidimensional cubes for advanced analytical processing, and SSRS to generate detailed operational reports. To provide rich visual insights and dashboards, we leveraged both Power BI and Tableau, helping stakeholders explore property sales, commissions, and trends for better business decision

SuperStore, *Tableau Public*

Tools: Excel, Tableau Conducted a comprehensive analysis of Superstore sales data using Tableau, focusing on regional performance, product profitability, and customer segmentation. Built an interactive dashboard and story to visualize key insights such as monthly sales trends, top-performing products, and geographic sales distribution. Leveraged filters, KPIs, and drill-down features to support strategic decision-making and enhance business understanding

Adidas Sales, *Github*

Tools: Excel, Power BI I analyzed Adidas sales data using Excel and Power BI by cleaning and preparing the dataset, then building an interactive data model to track key metrics like total sales, profit, and average margin. I designed a Power BI dashboard showing performance by region, state, store, and product. The analysis included comparing sales channels (Online, Local, Outlet) and identifying monthly trends. This project provided valuable insights to support data-driven marketing and business decisions.

Bike Store, *Github*

Tool: Excel Analyze Bike Store sales data by performing data cleaning, filtering, and summarization through pivot tables and formulas. Created dynamic dashboards to visualize key metrics such as total Product, top-selling products, and sum of orders, total quantity. Utilized advanced Excel functions and use slicer to filter data.

E-Commerce Database, *Github*

Tool: SQL Defacto is a popular clothes brand that wants to expand by launching an e-commerce website, the website has many categories such as men, women and kids with a variety of clothes choices in many occasions

Certificates

HackerRank SQL (Basic, Intermediate)

Associate Data Engineer in SQL
