Professional Summary

Computer Engineering graduate with hands-on experience in technical support, production systems operations, and database troubleshooting. Currently working as a Systems Operations Engineer at Huawei, supporting enterprise-scale telecom applications and resolving production incidents through monitoring, analysis, and SQL-based troubleshooting. Strong foundation in C#, SQL Server, Windows/Linux environments, and software development. Interested in industrial software solutions, HMI/SCADA systems, and delivering reliable technical support, implementation, and customer-focused solutions.

Experience

Systems Operations Engineer (CBS Project)

Feb 2026 – Present

Huawei Technologies – Cairo, Egypt

- Provide technical support for Convergent Billing Systems (CBS), troubleshooting application issues and supporting production operations.
- Analyze incidents, investigate system behavior, and execute SQL queries to validate data and identify potential root causes.
- Monitor system health, alarms, and service availability to maintain operational stability.
- Handle incidents through ticketing systems, document troubleshooting steps, and collaborate with technical teams for issue resolution.
- Gain practical experience supporting mission-critical enterprise systems in a production environment.

Full Stack (.NET) Trainee

Oct 2024 – Dec 2024

AZM Squad (formerly Algoriza) – Cairo, Egypt

- Developed web applications using C#, ASP.NET Core Web API, Entity Framework Core, and SQL Server.
- Designed database structures, implemented CRUD operations, and optimized queries.
- Applied software engineering principles including Clean Architecture, SOLID principles, and RESTful API development.
- Used Git/GitHub for source control and team collaboration.

Projects

Smart Exam Management System (Graduation Project)

Oct 2024 – Jul 2025

Designed and developed an exam management system using ASP.NET Core and SQL Server. Built database solutions using Stored Procedures, Triggers, and optimized indexing. Developed APIs integrated with a Python module for automated grading, improving evaluation efficiency by 70%.

Technical Skills

- **Technical Support & Operations:** Incident Troubleshooting, Production Support, Monitoring, Ticketing Systems, Root Cause Analysis, Documentation.

- **Databases:** Microsoft SQL Server, T-SQL, Database Design, Stored Procedures, Triggers, Query Optimization, Indexing, Normalization.
- **Programming Languages:** C#, SQL, Python, JavaScript, C++ (Basic).
- **Software Development:** ASP.NET Core, Web APIs, Entity Framework Core, LINQ, Visual Studio, Git.
- **Systems:** Microsoft Windows, Linux Administration Basics, Server Monitoring, Basic Shell Scripting.

Training

ITI 9-Month Professional Diploma – Web Development & BI-Infused CRM *Sep 2025 – Present*

Information Technology Institute (ITI) – Ministry of Communications, Egypt

Intensive training covering .NET Core, ASP.NET MVC, Advanced Database Systems, Computer Networks, Linux Administration, Agile methodologies, and software engineering best practices.

Education

Bachelor's Degree in Computer Engineering and Systems

Oct 2020 – Jul 2025

Faculty of Engineering, Zagazig University

Grade: Very Good (High) – 82.25%

Graduation Project: Excellent

Languages

- **Arabic:** Native.
- **English:** Upper-Intermediate (B2) – Able to communicate professionally and understand technical documentation.
