

MALAICHAMY SETHURAMAN

Application/Production Support

+91 9894417693 | +91 9047872021 | malai.hopes@gmail.com | Coimbatore, Tamil Nadu, India (open to relocate)

SUMMARY

15.3 years of IT experience including 8+ years leading production support, SRE, and AI/ML operations for mission-critical, regulated platforms at Citi Bank, Standard Chartered, WEX Inc., FIS, Nets (Nexi Group), Johnson & Johnson, AT&T, and British Telecom, as a Support Delivery Manager (SDM) and Application/Production Support leader. Acts as single point of accountability for end-to-end Application Support / AI-ML Ops service delivery, owning SLA/OLA/KPI performance, chairing weekly, monthly, and quarterly service reviews, and publishing executive dashboards, service matrices, and trend reporting. Provides L2/L3 production support for Kubernetes/AWS microservices and AWS SageMaker model endpoints, using Python for automated debugging, log analysis, model deployment validation, and synthetic payload testing; designs Prometheus, Grafana, Splunk, and AWS CloudWatch observability to track model inference latency, API throughput, data drift, and model output degradation, reducing mean-time-to-detect (MTTD) for AI operational risk.

Proven Major Incident Manager chairing P1/P2 bridges as primary escalation point across L1, L2/L3, QA, Infrastructure, Security, and Vendor teams, driving Incident, Problem, Change, and Release Management aligned with ITIL v4, RCA, and Post Incident Reviews (PIR). Leads globally distributed 24x7 support organizations (L1 Support Engineers, L2/L3 Developers, QA Engineers), owning workforce planning, shift rosters, and on-call coverage. Experienced leading end-to-end service transition — Knowledge Transfer, Shadow/Reverse Shadow, Hypercare, and Operational Readiness — and governing SOPs, runbooks, KEDB/KMDB, and escalation matrices. ITIL-certified SRE (DevOps Institute/PeopleCert) driving AIOps and GenAI-assisted incident triage (ChatGPT, Claude, Prompt Engineering) to improve MTTR and First Contact Resolution (FCR). Track record: 99% uptime, 95%+ SLA-compliant resolution, 98% change success rate, 20% YoY reduction in failures, and CSAT consistently above 4.3/5.

CORE COMPETENCIES

- **Service Delivery & Governance** — SLA/OLA/KPI Management, Executive Dashboards & Reporting, Service Matrices & Trend Reporting, CAB Governance, Vendor & Stakeholder Management
- **AI/ML Production Support** — AWS SageMaker Endpoints, Model Performance & Data Drift Monitoring, MTTD Reduction for AI Operational Risk
- **Major Incident, Problem & RCA Management** — P1/P2 Bridge Ownership, Escalation Point of Contact, Post Incident Review (PIR), ITIL v4-Aligned Practices
- **Service Transition & Knowledge Management** — Knowledge Transfer (KT), Shadow/Reverse Shadow, Hypercare, Operational Readiness, SOPs, Runbooks, KEDB/KMDB
- **Observability & Health Monitoring** — Prometheus, Grafana, Splunk Dashboards & Alerting, AWS CloudWatch/CloudTrail, Event-Correlation Dashboards, SLO/SLA Management
- **Python Scripting & Automation** — Debugging, Log Analysis, Deployment Validation, Synthetic Payload Testing, Pipeline Health Scripts
- **Secure MLOps & Change Release Management** — CAB-Governed Releases and Rollback for Containerized Services on AWS EKS/Kubernetes
- **Workforce & 24x7 Operations** — Shift Roster & On-Call Planning, L1/L2/L3 Team Leadership, 1:1s & Performance Reviews, Cross-Functional Coordination
- **AI, Automation & AIOps** — AIOps Strategy, GenAI-Assisted Triage (ChatGPT, Claude, Prompt Engineering), Self-Healing Automation, Anomaly Detection, MLOps-Adjacent Monitoring
- **Cloud & AI Platforms (AWS)** — EC2, EKS, Lambda, S3, SageMaker, AuroraDB, CloudWatch; working awareness of Azure
- **Disaster Recovery & Business Continuity** — Multi-AZ DR/BCP Planning and Drills for Critical AI & Platform Workloads
- **Regulatory, Data Privacy & Audit Compliance** — GDPR, Audit Logging, Data Governance & Lineage, IAM, Model Risk Management (MRM) Awareness
- **Metrics & Continuous Improvement** — MTTA, MTTR, Resolution SLA, Backlog & Ticket Aging, First Contact Resolution (FCR), CSAT

SKILL SET

- **AI/MLOps:** AWS SageMaker & SageMaker Endpoints, Model Performance & Data Drift Monitoring, Model Deployment Validation, Model Registry Awareness, MLOps Tooling Landscape (MLflow, Azure ML)
- **Service Delivery / SDM & ITSM:** SLA/OLA/KPI Governance, Service Reviews, ServiceNow, Jira, Remedy, ITIL v4 (Incident, Problem, Change, Release), Confluence
- **Scripting & Ops:** Python (automated debugging, log analysis, deployment validation, synthetic payload testing), Docker, Kubernetes (EKS)
- **Observability:** Prometheus, Grafana, Splunk Dashboards & Search Queries, AWS CloudWatch, CloudTrail Awareness, Datadog, Metrics & Alerting
- **Cloud & AI Platforms (AWS):** EC2, EKS, Lambda, S3, SageMaker, AuroraDB, CloudWatch; working awareness of Azure cloud services
- **CI/CD & MLOps Release:** uDeploy, CAB-Governed Release Management, Secure Rollback for Containerized AI Services (EKS), DevSecOps Practices, awareness of Jenkins, GitHub Actions, AWS CodePipeline/CodeBuild/CodeDeploy
- **Data & Integration:** SQL/PL-SQL (Oracle 19c), Batch & Real-Time Processing (Control-M, Autosys), REST APIs, Data Pipeline Validation & Data Quality Checks
- **Security, Identity & Governance:** IAM, AWS KMS & Secrets Manager awareness, VPC Security (Subnets, NACLs, Security Groups), GDPR, Audit Logging, Data Governance & Lineage, DR/BCP (Multi-AZ)
- **Workforce & Operations Leadership:** 24x7 Shift Roster & On-Call Planning, L1/L2/L3 Team Management, 1:1s & Performance Reviews, KT/Shadow-Reverse Shadow/Hypercare
- **AI & Automation:** ChatGPT, Claude, Prompt Engineering, GenAI-Assisted Incident Triage & Workflow Automation, AIOps Strategy
- **Frontend:** React, TypeScript

PROFESSIONAL EXPERIENCE

Project Manager – Information System Management (Production Support / SDM) | WEX Inc. Apr 2024 – Jul 2026

- Acted as single point of accountability for end-to-end Application Support and AI/ML Ops service delivery across a 24x7 Kubernetes-based microservices platform on AWS alongside AWS SageMaker model endpoints, owning SLA/OLA/KPI performance and chairing daily and weekly service reviews with clients and cross-functional teams for the International Fleet Control System (IFCS) platform.
- Provided L2/L3 production support using Python for automated debugging, log analysis, model deployment validation, and synthetic payload testing; designed Prometheus metrics and Grafana dashboards to monitor model inference latency, API throughput, system resource utilization, and operational health.
- Implemented monitoring alerts via Prometheus and AWS CloudWatch to track data drift, model output degradation, and pipeline execution failures, reducing mean-time-to-detect (MTTD) for AI operational risk.
- Led Major Incident (P1/P2) bridges as primary escalation point across L1, L2, L3, QA, Infrastructure, and Vendor teams, driving RCA and Post Incident Reviews (PIR) to eliminate recurring issues, sustaining 95% SLA-compliant delivery with a 20% reduction in resolution time.
- Governed change, release, and rollback for containerized AI microservices on AWS EKS through CAB, applying risk-assessed deployment decisions to sustain a 98% change success rate, and executed multi-AZ Disaster Recovery (DR) and business continuity drills with 100% drill success.
- Devised and executed an AIOps strategy and automation roadmap — embedding GenAI (ChatGPT, Prompt Engineering) into incident triage, rolling out ServiceNow-integrated ITSM automation, and introducing self-healing routines for batch/health-check operations (Control-M).
- Built and maintained executive dashboards, service reports, matrices, and trend reporting tracking MTTA, MTTR, backlog, ticket aging, FCR, and CSAT for leadership and clients.
- Owned workforce planning, shift rosters, and on-call scheduling for a 24x7 support organization spanning L1 Support Engineers, L2/L3 Developers, and QA Engineers; conducted 1:1s and performance reviews while sustaining 99% uptime and a 20% YoY reduction in batch failures.

- Led end-to-end service transition workstreams (Knowledge Transfer, Shadow/Reverse Shadow, Hypercare) and established SOPs, runbooks, knowledge base, KEDB/KMDB, and escalation matrices, raising delivery predictability while sustaining CSAT above 4.3/5.
- Partnered with Engineering, Data Science, Risk, and Compliance on secure deployment governance, monitoring, audit logging, and GDPR/regulatory audit readiness, and identified automation and cost-optimization opportunities across AWS compute, storage, and monitoring.

Project Lead – L2 Production/Technical Support Team Manager | Nets (Nexi Group)

Dec 2021 – Apr 2024

- Led a geographically dispersed L2/L3 support team delivering 24x7 coverage for cross-border payments clearing and settlement platforms for Nexi Group, a leading European payments/fintech company, serving as primary Escalation Point of Contact for P1/P2 incidents.
- Owned service delivery governance — chairing daily, weekly, monthly, and quarterly service reviews with clients, partnering on resource/shift planning, and leading SLA/SLO/OLA governance discussions.
- Built custom Splunk dashboards, search queries, and alerts for real-time log ingestion, auditing model inference requests, tracking API failures, and ensuring GDPR and regulatory audit readiness; built ServiceNow event-correlation reporting to reduce recurring alerts.
- Developed Python automation scripts to replace manual health checks, automate batch data pipeline validation, and scrape operational metrics into centralized monitoring tools; stood up Control-M-based orchestration for large-scale financial batch and file-transfer processing.
- Instituted DR failover/switchover procedures across the Nordics region, achieving 100% drill success, and governed end-to-end Change Management (CAB) with development and infrastructure teams for zero-disruption hotfix deployment.
- Led application transition from incumbent teams into steady-state operations, owning Knowledge Transfer, Shadow/Reverse Shadow, and Hypercare, and maintaining SOPs, runbooks, KEDB/KMDB, and escalation matrices.
- Led L2/L3 incident response and RCA for data pipeline stalls and model invocation timeouts, sustaining zero compliance breaches and 99% uptime, with a 20% MTTR reduction and zero repeat incidents.
- Directed daily task allocation, workforce and shift-roster planning, and weekly RCA/problem-management reviews across L1/L2/L3, QA, and Support Engineers, sustaining 99% on-time delivery, stakeholder satisfaction above 4.3/5, and cutting delivery failures 20% YoY.

Production Support Manager | Johnson & Johnson

Dec 2020 – Dec 2021

- Delivered L2 production support for Guiding Care integration and healthcare applications, chairing daily/weekly/monthly service reviews with clients and cross-functional teams and meeting SLA/OLA commitments on incident, service, problem, and change tickets.
- Acted as escalation point for P1/P2 issues, coordinating across Development, QA, Infrastructure, and Vendor teams to drive RCA and Post Incident Reviews, and debugging API calls, middleware logs, and SQL data issues.
- Partnered with Development and QA on hotfix and release delivery (C#/.NET), managing change and release through CAB and coordinating secure deployment and rollback across environments.
- Supported service transition and Operational Readiness, including Knowledge Transfer and Hypercare during application onboarding, maintaining SOPs, runbooks, and knowledge base articles for L1/L2 handoff.
- Participated in 24x7 on-call rotation and shift planning, tracking SLA compliance, ticket aging, and CSAT metrics in weekly reporting, and supporting DR/BCP planning and GDPR compliance.

Production Support Manager | Citi Bank

Dec 2018 – Nov 2020

- Managed delivery, access governance, and audit-compliant operations across core banking production platforms, chairing weekly and on-demand stakeholder status meetings and tracking operational metrics (MTTA, MTTR), dependencies, and regulatory compliance requirements.
- Deployed ITRS Geneos-based monitoring and configured Autosys job scheduling with self-healing retry logic to curtail manual intervention on batch failures; analyzed Oracle 19c data via SQL/PL-SQL to isolate root causes and drive Problem Management.
- Coordinated emergency fixes and change requests via uDeploy, managing deployment, release, and rollback across environments in compliance with change governance, audit, and financial regulatory standards.

- Led trend analysis and RCA on recurring batch and application incidents, participated in 24x7 on-call rotation as escalation point across L1, L3/Development, Infrastructure, and Vendor teams, and sustained 99% uptime with 95% SLA-compliant incident resolution.

Support Lead (E Grade) | *Standard Chartered Global Business Services*

Jan 2017 – Nov 2018

- Established ITIL-aligned incident and change management workflows and structured production support processes, introducing batch-monitoring and RCA-reporting routines that contributed to a 20% YoY reduction in delivery/batch failures.
- Managed critical incidents and escalations end-to-end as part of the Incident Management Team, directed daily task allocation and shift coverage, and chaired weekly RCA and service review meetings, sustaining stakeholder satisfaction above 4.3/5, 99% uptime, and 95% SLA-compliant resolution.

Senior Software Engineer (P3) | *FIS — Financial Technology*

Jul 2015 – Dec 2016

- Delivered 2nd-line product support and Incident Management Team activities for a financial-transaction/AML monitoring platform in a regulated environment, managing client issues via ServiceNow and CMS through to resolution and tracking SLA and ticket aging.
- Built custom SQL-based reporting and shell-script automation for client status reporting, coordinating requirements, testing, and delivery timelines with stakeholders while sustaining 99% uptime and 95% SLA-compliant resolution.

Software Engineer (U2) | *Tech Mahindra Ltd, Chennai*

Apr 2011 – Jun 2015

- Supported delivery of monitoring capability for IBM DataStage ETL jobs on AT&T's customer data pipeline, established defect-tracking workflows within Clarify CRM, and coordinated requirements and testing with technical stakeholders — early exposure to log-based monitoring and data pipeline observability.

CERTIFICATIONS & EDUCATION

- DevOps Institute Certified SRE Foundation (PeopleCert) — #GR558002804MS, Effective 20 Nov 2025, Renew by 20 Nov 2028
- B.E. (Computer Science & Engineering) — Mohamed Sarthak Engineering College, Anna University, Chennai, 2010 (76%, Distinction)
